WHAT'S UP WITH MILK?
I was born right here on this farm.
My farmer takes good care of me.
My farmer takes care of the land that grows my food.
I eat corn and hay for lots of energy.
My farmer gives me a clean, warm barn to sleep in.
To make sure I grow up healthy, my farmer has the doctor come to the farm for check-ups.
Now that I'm grown up, I get milked twice a day.
A big truck takes my milk and keeps it cold on the way to the plant.
At the plant, they put my milk in bottles or make my milk into cheese, yogurt and other dairy products.
This is where you come to buy the foods made with my milk.
Drinking milk in school gives you plenty of energy.
Eat plenty of foods made with milk and you’ll grow up healthy and strong.
